

MEMORANDUM

Date: January 5, 2021
To: Residents & Families
Fr: Chris Parker, Executive Director
Re: Atterdag Village Vaccination Update

Dear Residents & Families,

Atterdag Village vaccinated 95% of our residents on January 2nd with the first dose of the Pfizer vaccine. The day went smoothly with minimal side effects the next day. The second dose will be given on Saturday January 23rd. The first dose primes the immune system, and the second dose gives you the optimal antibody response. It is critical for all of our Residents to receive both doses of the vaccine to achieve the 95% efficacy. Those Residents and staff that did not receive the first dose on January 2nd will be able to receive their first dose (if desired) on January 23rd with a second dose offered on February 13th.

The past two months have seen significant spikes of COVID across our state and county, and 1.5 million new cases in just the last week across the Country.

It is critical to remind all of our Residents, Families and Staff that despite the Residents receiving the first dose of the vaccine it is imperative that we all continue to follow the necessary precautions:

- 1) Wear a Mask
- 2) Maintaining 6-Foot Distance (Outside if Possible)
- 3) Consistently Washing and Sanitizing Your Hands
- 4) Avoid Crowds

I appreciate everyone's support during these challenging times in keeping our Residents and Staff safe and COVID free.

Thank You,

A handwritten signature in blue ink, appearing to be "CP" or "Chris Parker".
